Work Experience

Upskill Mafia

Full-stack Developer Intern

Sep, 2024 - Dec, 2024

- Gained hands-on experience in full-stack development using React, Express, MongoDB, and Tailwind.
- Enhanced problem-solving skills and learned industry best practices in web development.
- Collaborated on real-world projects, building dynamic web applications.

Projects

Laundry Wallah

Developed a web-based service booking platform with HTML, CSS, and JavaScript. Features include service listing, real-time cart management, form validation, and EmailJS integration for seamless order processing.

- Increased user engagement by 30% through dynamic interactions and responsive design.
- Reduced booking time by 25% with efficient EmailJS integration for streamlined order processing.
- Successfully implemented real-time cart management and form validation to enhance user experience.

Drive File Management System

Developed Trash and Shared features for a cloud-based file management system using the MERN stack, improving file recovery, sharing, and user experience with secure, organized data handling.

- Developed a cloud-based file management system with features for uploading, sharing, and organizing files and folders.
- Contributed to the Trash and Shared features, enabling users to recover deleted files and share files with other users securely.
- Utilized a full-stack environment with MongoDB, Express.js, React, and Node.js.
