Summary

Motivated full-stack developer with hands-on experience in React, Express.js, MongoDB, and Tailwind CSS. Passionate about building user-friendly, scalable web applications and continuously improving development skills. Proficient in frontend and backend technologies, with a strong focus on problem-solving and REST API integration. Eager to contribute to innovative projects that enhance efficiency and user experience.

Education

St.Matthews Public School
Sr.Secondary(10+2)
Apr, 2018 - Mar, 2020

Technical Skills

HTML, CSS, JavaScript, React.js, Tailwind CSS, Node.js, Express.js, Pug, Ejs, REST APIs, MongoDB,GitHub, Postman, VS Code, Vercel, Netlify,Hostinger,VPS

Soft Skills

Collaboration, Problem-solving

Languages

English, Hindi

Certifications

- Responsive Web Design
- JavaScript Algorithms and Data structures
- Front-end Development-libraries
- Backend Development And APIs
- Node.js, Express, MongoDB & More: The Complete Bootcamp

Work Experience

MHJ Pharmaconcepts*
Backend Developer

- Designed and implemented server-side logic, database structures, and backend functionality to support business operations.
- Developed and integrated APIs, ensuring secure, scalable, and efficient data flow across systems.
- Collaborated with the development team to optimize performance, enhance security, and deliver reliable backend solutions.

Upskill Mafia
Full-stack Developer Intern
Sep, 2024 - Jan, 2025

- Improved web application performance through the development of scalable full-stack systems using React and Express.js.
- Delivered multiple full-stack web application projects by leveraging React, Express.js, and MongoDB to create engaging and responsive user experiences.
- Enhanced code efficiency and maintainability by applying hands-on experience in both frontend and backend development.

Projects

Futuristic Design - Professional Interior Design Services

- Developed a modern, responsive interior design website to showcase services like 3D design, renovation, space planning, and turnkey projects.
- Ensured an intuitive user experience with a clean, visually appealing interface.
- Optimized for high performance and responsiveness, enhancing accessibility across all devices.

Bistro Bliss – Scalable and High-Performance Restaurant Website

- Built a high-performance, scalable restaurant website with an optimized user experience across all devices.
- Technology Stack: Built with Vite, React.js, and Tailwind CSS, ensuring a fast, responsive, and maintainable frontend.
- Focused on performance optimization, delivering a seamless and engaging UI.

Drive File Management System

- Contributed to the Trash and Shared features of a cloud-based file management system using the MERN stack.
- Trash Feature: Implemented file recovery functionality, enabling users to restore deleted files efficiently.
- Shared Feature: Developed secure file-sharing capabilities, ensuring controlled access and data integrity.
